

Style template for ICWE 2023 conference

First A. Author, Second B. Author and Third C. Author

Abstract These instructions give you guidelines for preparing the full paper for ICWE 2023, the XVI International Conference on Wind Engineering using L^AT_EX. For submission guidelines, follow instructions on the Conference website. The abstract must be composed by a single paragraph of maximum 200 words.

Key words: lattice tower, CFD model, up to 6 keywords

1 Introduction

This document is a guide for L^AT_EX users. If you are reading the PDF version of it, please download the file, ICWE_2023_Full_Paper_LaTeX.tex. A paper length of either 10 or 12 is recommended (in any case, no more than 12 pages are allowed: those papers exceeding this limit **will not be reviewed**).

2 Page Size, Margins and Font

The page size is standard A4. For margins and font, just use the present template and do not alter anything.

3 Titles, Authors and Affiliations

For title, authors and affiliations please use the present template and do not alter anything.

Name of First Author
Name, Address of Institute, e-mail: name@email.address

Name of Second Author
Name, Address of Institute e-mail: name@email.address

Name of Third Author
Name, Address of Institute e-mail: name@email.address

4 Sections and Subsections

Sections are numbered consecutively. Subsections are numbered as x.y, where x is the section number and y is the subsection number. Both section and subsection numbers start from 1.

5 Figures and Tables

5.1 Figures

Figures should be placed according to this template and numbered sequentially. In the text a figure is referred as “Fig. 1 shows the power spectral density of modal responses...” or “the response associated with the first vibration mode is dominant (Fig. 1)”. The symbols used in the figure axis labels should be defined in the text.

Figure captions are aligned on the left.

Fig. 1 Power spectral density of modal responses

5.2 Tables

Tables must be formatted as shown in Table 1 and referred in the text as “The correct page margins are listed in Table 1” or “...make sure to respect the correct page margins (Table 1)”.

Table captions are located above the tables, aligned to the left.

Table 1 Table caption

Row 1	A	B	C	D
Row 2	1	2	3	D
Row 3	Text	Text	Text	Text

6 Equations

Equations must be centred and numbered sequentially. Numbers should be right justified. Equations must be referred in the text as “Eq. (1) defines the kinetic energy”.

$$K = \frac{mc^2}{\sqrt{1 - (v/c)^2}} - mc^2, \quad (1)$$

where m is the mass, v is the speed, and c is the speed of light in vacuum. All the symbols must be defined at their first appearance in the article. Scalar variables are indicated in italics, while matrices and vectors are bold-faces as:

$$\mathbf{Ax} = \mathbf{b}. \quad (2)$$

Equations must be referred in the text as “Eq. (1)” for one equation or “Eqs. (1), (2) and (3)” for multiple equations.

7 References

Use author-date style references (see References at the end of this document). Please note that the references at the end of this document are in the preferred referencing style, with examples given for books (Bendat and Piersol, 2000), journal articles (Andersen et al., 2005), conference papers (Baldwin and Lomax, 1978). References in text may also be cited as “Bendat and Piersol (2000) demonstrated that...”.

8 Conclusions

Once the text is complete, we recommend that you run a spell check through the text. Convert the document to a PDF file and upload it, together with the source files, through the on-line submission platform. Please go to <https://www.icwe2023.com/> and follow the instructions under “Submission” in the section “About”. If you have any questions, please contact the Organising Committee at: org.committee@icwe2023.unifi.it.

For submission, the name of the file that you choose is not important. Files will automatically be renamed by our on-line system after submission. Please submit the

full paper by **15th January 2024**. Please be aware that if the submitted full paper is not prepared according to above guidelines or it is submitted after the deadline, **it will not be reviewed.**

Acknowledgements The activity presented in the paper is part of the research grant ...
